Innovating with Software Development Excellence

WEZOM

LEADING_

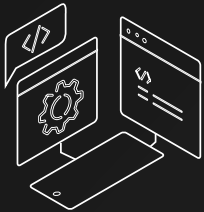

Software Development Company

WEZOM is a leading software development company with a proven track record of delivering high-quality, custom-built solutions for businesses across multiple sectors, including energy, oil and gas, retail, and beyond. With over two decades of experience and over 250 full-time certified specialists, WEZOM has established itself as a trusted IT partner for companies looking to optimize business processes, modernize legacy systems, and enhance operational efficiency. WEZOM is known for its agile approach, technological versatility, and deep commitment to delivering value for its clients.

Technological_

Expertise

At the heart of WEZOM's service offering is its robust expertise in a wide range of cutting-edge technologies. The company specializes in front-end and back-end development, utilizing frameworks like React.js, Next.js, and REST API for user interface design while handling server-side needs with platforms like PHP, Node.js, and Java Spring. The company's mobile app development capabilities span Swift for iOS and Kotlin for Android, ensuring a seamless experience across devices. Furthermore, WEZOM's deep understanding of database and server technologies such as AWS, MySQL, and PostgreSQL enables it to build scalable, secure, and efficient systems for clients, regardless of industry or size.

These diverse technological capabilities empower WEZOM to take on various projects, from enterprise-level software development to mobile applications and complex system integrations. WEZOM's holistic approach means it not only builds software but also provides strategic consultation to ensure that the technological solutions align with the client's long-term business goals.

```
elif operation == "MIRROR_X":
    mirror_mod.use_x = False
    mirror_mod.use_y = True
    mirror_mod.use_z = False
elif operation == "MIRROR_Z":
    mirror_mod.use_x = False
    mirror_mod.use_y = False
    mirror_mod.use_z = True
```

```
#selection at the end -add back the deselected mirror modifier
mirror_ob.select= 1
modifier_ob.select=1
bpy.context.scene.objects.active = modifier_ob
print("Selected" + str(modifier_ob)) # modifier ob is the active ob
mirror_ob.select = 0
new = bpy.context.selected_objects[0]
new.data.object(mirror_ob.select= 1)
```

Agile Development Process

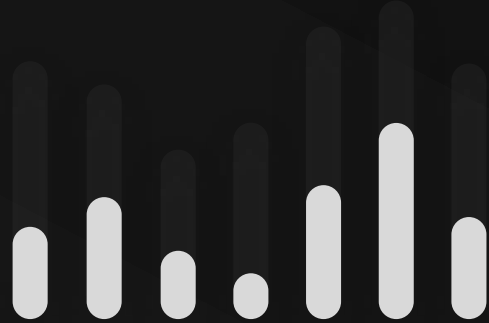

WEZOM's development methodology is grounded in Agile, a project management framework designed to improve productivity and adapt to changing project requirements. Agile's iterative approach allows for the ongoing development of software through "sprints," which are fixed periods of two to four weeks. Each sprint produces functional software updates, ensuring clients receive tangible results throughout development.

The Agile framework also fosters close collaboration between WEZOM's dedicated development teams and the client, enabling swift adjustments based on feedback and changing needs. This results in greater project transparency, faster turnaround times, and more reliable software delivery. WEZOM's development process is particularly well-suited for projects requiring rapid prototyping, frequent iterations, or the integration of complex functionalities into existing systems.

Customized_ Solutions

for Industry-Specific
Needs

1.

WEZOM's approach to software development is uniquely tailored to meet the specific needs of industries that require specialized functionality, such as energy, oil and gas, and enterprise-scale businesses. For instance, a client in the oil and gas sector sought WEZOM's expertise to develop a custom billing CMS for electricity and natural gas distribution.

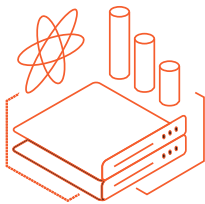

2.

Previously reliant on Bitrix24 CMS and 1C ERP systems, the client faced limitations due to the lack of customization options and growing concerns over data security. WEZOM's tailored solution addressed these issues and integrated the client's unique business processes into the CMS platform, creating a secure, efficient, and scalable system.

3.

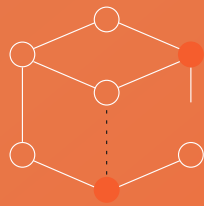

In another example, a client needed a comprehensive HRMS platform to optimize their human resource management and business processes. By leveraging WEZOM's technical expertise, the client increased time efficiency by 64.7% and improved HR process performance by 52.9%. This case exemplifies how WEZOM delivers high-value, custom-built solutions that enhance the client's operational efficiency and overall performance.

Strategic_ Solutions for Business Growth

Beyond software development, WEZOM positions itself as a strategic partner for clients looking to grow and expand their businesses. The company is adept at providing solutions that meet immediate needs and offer long-term scalability. This is particularly crucial for businesses in industries like oil and gas, where the regulatory environment and market conditions can change rapidly.

One of WEZOM's key strengths is its ability to develop software that evolves alongside a company's growth trajectory. For example, WEZOM is currently developing a custom billing CMS solution for a company serving over a million users in the energy sector. The project, which has already launched its MVP (minimum viable product), exemplifies how WEZOM's solutions are designed with future expansion in mind. The system's ability to adapt to new data security requirements and integrate complex business processes underscores the importance of flexibility and customization in WEZOM's work.

Global Reach and Recognition

Wezom's footprint extends globally, with six offices across multiple countries, enabling the company to serve clients from diverse regions and industries. This global presence is a testament to the company's capacity to scale and deliver services internationally while maintaining the agility and attention to detail typically associated with smaller firms.

The company's reputation for excellence is reflected in its customer satisfaction ratings, including a 5.0 rating on Clutch, a platform that ranks B2B service providers based on verified client reviews. This recognition results from WEZOM's commitment to delivering high-quality, innovative solutions that meet each client's specific needs. With a portfolio of over 250 current clients and over 2,500 completed projects, WEZOM has established itself as a leader in the software development space, particularly for enterprise-level clients seeking advanced technological solutions.

Conclusion

WEZOM's deep technological expertise, agile development processes, and ability to provide customized solutions for complex business challenges make it a trusted partner for companies across the globe. With a strong focus on client collaboration, industry-specific needs, and long-term scalability, WEZOM is well-positioned to continue delivering high-impact software solutions that drive business growth and innovation. The company's global reach and impeccable reputation further enhance its ability to serve as a reliable partner for clients in a wide array of industries, ensuring that businesses can thrive in an increasingly digital and competitive landscape.
